SUMMARY

As a Frontend developer, I have demonstrated the ability to create high-quality websites with a focus on user experience and performance

PROJECTS

[Demo College System](#)

- I used in this project a lot of technologies and libraries such as Nodejs, Express, Ejs, Mongodb, Bootstrap, Swiperalert2 and Xlsx .
- This project consists of three users admins, professors, and students.
- Students can register the subjects to be learned only once and view the content of each registered subject.
- In this project Admins can add , edit and delete students or professors or admins, they can also add , edit and delete departments or subjects ,they can download xlsx A file containing the names of the students who registered that Subject To create an absence file for that subject.
- Professors can upload the content of each subject they can teach, record the grades of all students participating in this subject, record the attendance of each student during the lecture, and print the file.

[Movies App](#)

- I used in this project a lot of technologies and libraries such Reactjs, React-bootstrap,React-router-dom,React-redux,axios and reactpaginate.
- This project displays a library of films with a search engine, and when clicking on each film, details of the film, and the platform on which it located appear.

[Tic-Tac-Toe game](#)

- It's a small project of HTML, CSS, and js for a tic-tac-toe game.
 - In this project, using the Minimax algorithm, I used Algorism for making the site never lose to users.
